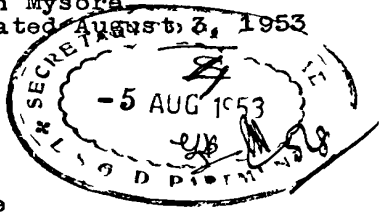
Office of the Director of Public Health
in Mysore
Bangalore, Dated August 3, 1953

No.B E 1068 /53-54



To

The Secretary to Government,
L S G & Planning Departments,
Bangalore

Sir,

Adverting to Government Order No L 2969-72/CM 27-53-52 dated 4th June 1953 sanctioning a new set of bye-laws for the control and supervision of places used for dangerous trades etc I write to state that there are certain defects which will have to be remedied, if the bye-laws are to be useful

1 The first clause states that no person shall carry on the trades specified in sub clauses (a) (b) and (c) within 200 yards of any human habitation The distance specified is too short to permit any of these offensive and dangerous trades being carried out They should not be permitted within a mile of the last dwelling house As the fumes, smoke, smell etc , from these kilns are carried on to a distance of more than half a mile with favourable winds, one mile would be a very safe margin to render inocuous the offensive gases that emanate from the dangerous trades

Burning of bricks may also be included in the list of offensive and dangerous trades

The persons engaged in the above trades are often found to excavate earth in the municipal limits and it is difficult to keep a watch on those actually excavating as this is done usually in the night when there is none to watch The pits thus created collect water forming potential breeding places for mosquitoes endangering the health of the residents This is another reason why these trades should be kept well beyond the municipal limits

Yours faithfully,

T Chandrasekharaiya

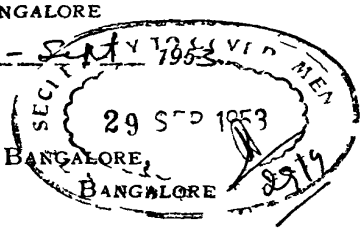
CORPORATION OF THE CITY OF BANGALORE.

No A.1-(28)/52-53

CORPORATION OFFICES,
BANGALORE
Dated 28-9-1953



FROM

THE COMMISSIONER,
CORPORATION OF THE CITY OF BANGALORE,
BANGALORE

To

The Secretary to the Government of Mysore,
L S G and Planning Departments, Bangalore

C M 27-53-110

SIR :

Subject - Bye-laws for the sanitary control and supervision of places used for storing or manufacturing lime-shell, surki, etc ,

---

With reference to your letter o L 6677, dated the 3rd September 1953, I write to say that if, as suggested by the Director of Public Health in Mysore, the place of business for storing or manufacturing lime-shell, surki, etc , is to be beyond one mile from the last dwelling house it may lead to practical difficulties Further, the distance of 200 yards is fixed as per bye-laws framed by the Madras Corporation The bye-laws approved in Government Order No L 2969-72/C M 27-53-52, dated the 4th June 1953 have already been published in final form in the Mysore Gazette as required under section 373 of the City of Bangalore Municipal Corporation Act, 1949

2 With regard to the other two suggestions made by the Director of Public Health, I write to say that as per paragraphs 1 and 2 of Part I of the draft forwarded with my letter No A 1 (10)/52-53, dated the 22nd May 1953, manufacturing or burning of bricks are prohibited within the Corporation limits without a licence from the Commissioner, and under paragraphs 1 and 2 of Part II of that draft, digging for gravel or sand or earth for making bricks within the Corporation limits is also prohibited without a licence from the Commissioner and all persons who are

granted

granted licences are bound to fill in all the pits dug by them or o level properly the site so as to avoid injury to public works or public health These provisions will be strictly adhered to while granting licences

If, by experience gained by working these bye-laws for some time, any amendment is considered necessary, suitable action will be taken in the matter
